

QA “QUICK TIP”

If your facility Program Design states you will provide a Psychiatrist consultant, do not attempt to have your residents referred to VMRC’s Tele-medicine Clinic for Psychiatric Medication Monitoring. This would be considered a failure to implement your Program Design and/or the IPPs, which could result in a corrective action plan (CAP). Remember, *any* consultant change necessitates an update to your Program Design and Organizational Chart. Contact your QA Liaison right away for assistance with the process.
