Trends through the eyes and ears of Assistant Director, Resource Development

WORK HARDER- this is the FUTURE

- Regional Centers (resource development) will need to continue to work with community partners (Speaker's Bureau) to get the message out about what we DO and DON'T do- what our / their needs are- i.e. Based on cultures, etc.
- Increase early start and services for children – person centered
- Fiscal conservatism in regards to the use of CPP/ CDRP dollars to target those with the most significant needs first and make modifications *to support those who are in need but not represented in CPP/ CDRP plans (a safety net)*
- Need to continue to re-evaluate existing residential service provides to assure sustainability of Level 3/ Level 2 homes as people age – we increase the amount of res services for higher levels of care and need to be mindful *of sustainability of lower level homes*
- Increased need for staff and provider training from outside sources (VMRC staff cannot do it all) maximize resources
