1) Plug in the hours available for support in each category, in the ratios specified in the parentheses.										
2) The sheet will perform the calculations to give you the totals in the last two columns.										
3) More than one schedule may be calculated, to account for holidays/vacations etc.										
4) Please note that the total amount of uncovered hours is only the maximum available without duplicating other services, and not necessarily the amount that should be authorized. Family responsibility/natural supports must also be factored in.
